SYE[®]
ENERJİ

www.sysenerji.net

SYS ENERJİ is one of the most important electrical contracting and solar energy companies in Turkey, combining many years of experience in different fields of electricity and energy with an innovative and innovative perspective.

SYS ENERJİ, which makes a difference in customer satisfaction with its expert staff, after-sales service and service understanding in accordance with international standards in all its activities, continues to work to achieve its success in the Turkish energy sector in Asian and European countries.

SYS ENERJİ's main goal is to produce high quality SPP projects that will meet the needs and expectations of our customers. In line with this goal, it provides continuity by providing product supply, project design, engineering and turnkey contracting services. It aims to serve as a brand that makes a difference in Turkey and the world market by ensuring customer satisfaction with product quality and durability, product technology and price, after-sales services.

As company management and employees, we adopt learning and continuous development, teamwork, individual development and corporate growth, improving cooperation with our customers and suppliers, protecting and enriching the natural environment for sustainable prosperity and quality of life as our core values and corporate principles in all our decisions and activities. All our employees are continuous practitioners and advocates of this policy with a customer-oriented quality approach and the passion and excitement of "being excellent in everything we do".

Our Vision

To provide innovative solutions to pioneer a sustainable future and accelerate the energy transition around the world by harnessing the limitless energy potential of the sun. To be a reliable and leading energy company that adds value to our customers, society and the environment.

Our Mission

Providing our customers with the best quality solar energy solutions to lower their energy costs, reduce their carbon footprint and guide them on their sustainability journey. To contribute to the clean energy transition worldwide by promoting the widespread adoption of solar energy, combined with innovative technologies and expertise.

Our Services

- Drone shots of the roof/land before and after installation
- Counseling and support
- Support with official procedures, permits
- Roof analysis for roof use permits (Required for unlicensed applications on building roofs)
